

Elemental Impurities

BioHale® Sucrose

Product group: Biopharma

Brand name: BioHale® Sucrose

Product description: Sucrose low endotoxin

grade

Document No.: PD-0848 Page 1 of 2

Dear Customer,

In the framework of the ICH Q₃D (R₂) guideline, DFE Pharma tested batches of pharmaceutical, low endotoxins grade BioHale® Sucrose.

Neither the elements listed below, nor elements classified as 2B, are intentionally added during the production process.

DFE Pharma performed analysis on relevant elemental impurities categorized as class 1, class 2A and some class 2B, class 3 and other relevant elements by the ICH Q₃D (R₂) guideline (according to table 5.1: Elements to be considered in the Risk Assessment – Inhalation Dosage Form).

The limits below are based on option 1 of the Q₃D (R₂) final guideline, based on administration of not more than 10q of drug product per day.

Analysis was performed using the analysis technique ICP-MS (Inductively Coupled Plasma-Mass Spectrometry) conforming to USP-NF <233> and Ph. Eur. 2.4.20.

Table 1: Table of elemental impurities following ICH Q3D (R2)

Metal	Class	Limit in ppm Required for inhalation inhalation (parenteral if lower)		Tested at DFE Pharma
Cadmium	1	0.3 (0.2)	Yes	Yes
Lead	1	0.5	Yes	Yes
Arsenic	1	0.2	Yes	Yes
Mercury	1	0.1	Yes	Yes
Cobalt	2A	0.3	Yes	Yes
Vanadium	2A	0.1	Yes	Yes
Nickel	2A	0.6	Yes	Yes
Selenium	2B	13 (8)	No	Yes
Lithium	3	2.5	Yes	Yes
Antimony	3	2	Yes	Yes
Barium	3	30	Yes	Yes
Molybdenum	3	1	Yes	Yes
Copper	3	3	Yes	Yes
Tin	3	6	Yes	Yes
Chromium	3	0.3	Yes	Yes
Aluminium	None	None	No	Yes
Strontium	None	None	No	Yes

^{*1:} Limits are based on option 1 of the ICH Q₃D (R₂) guidelines, based on administration of not more than 10g of drug product per day (stated in table A.2.2).

Table 2: Results of elemental impurities in low endotoxins grade BioHale® Sucrose

Batch			BioHale [®]	BioHale [®]	BioHale [®]
Metal	Limit (ppm)	Report limit (ppm)	Sucrose 108N551 (ppm)	Sucrose 109ZTKW (ppm)	Sucrose 10C4V30 (ppm)
Cadmium	0.3 (0.2)	0.005	<0.005	<0.005	<0.005
Lead	0.5	0.01	<0.01	<0.01	<0.01
Arsenic	0.2	0.005	<0.010*	<0.005	<0.005
Mercury	0.1	0.006	<0.006	<0.006	<0.006
Cobalt	0.3	0.005	<0.005	<0.005	<0.005
Vanadium	0.1	0.002	<0.002	<0.002	<0.002
Nickel	0.6	0.030	<0.03	<0.03	<0.03
Selenium	13 (8)	0.004	<0.004	<0.004	<0.004
Lithium	2.5	0.004	<0.004	<0.004	<0.004
Antimony	2	0.005	<0.005	<0.005	<0.005
Barium	30	0.005	<0.110	0.110	0.069
Molybdenum	1	0.020	<0.02	<0.02	<0.02
Copper	3	0.010	0.015	<0.010	<0.010
Tin	6	0.25	<0.010*	<0.010*	<0.25
Chromium	0.3	0.030	<0.03	<0.03	<0.03
Aluminium	None	0.200	<0.2	0.32	<0.2
Strontium	None	0.005	<0.005	<0.005	<0.005

^{*}At time of measurement the reporting limit was different

A risk assessment was performed. This document and raw data is available for review during audits. Conclusion of the risk assessment is that all values obtained are below 30% of the limits and thus do not need additional control, the change control procedure is the key to maintain this situation. The levels of ICH Q_3D (R_2) relevant elemental impurities are monitored on regular basis.

This statement substitutes all previous versions issued for the brand names mentioned above. We trust this information, which is made up to the best of our knowledge, will be helpful to you.

With kindest regards,
