

Shelf Life – Statement

Product group: Superdisintegrants
Brand name: Primojel® and Primellose®
Document No.: PD-0313 Page 1 of 1

Dear Customer,

DFE Pharma GmbH & Co. KG has defined a shelf life for all of its products based on a stability testing program. DFE Pharma guarantees that its products comply with all specifications up until the end of their shelf life period (the expiry date), provided these are stored in the original and closed packing under normal warehouse conditions.

Dates of production and expiry date are printed on every packing unit and on the corresponding Certificate of Analysis.

For Superdisintegrants the established shelf life is listed below:

Brand Name	Shelf Life
Primojel®	5 years
Primellose®	5 years

The shelf life of the products as listed above is derived from results of stability studies based on a stability testing program conforming to IPEC Excipient Stability Program Guide 2010.

DFE Pharma does not perform retesting at the end of the shelf life period. It is the customers' responsibility to determine if the product can still be used in their application after the end of the shelf life period.

This statement substitutes all previous versions issued for the brand names mentioned above. We trust this information, which is made up to the best of our knowledge, will be helpful to you.
