

Shelf Life – Statement

Product group: MCC
Brand name: Pharmacel®
Document No.: PD-0481 Page 1 of 1

Dear Customer,

DFE Pharma GmbH & Co. KG has defined a shelf life for all of its products. For Pharmacel® the established shelf life is 4 years, based on historical data.

End of the shelf life period is expressed as re-test date and printed on every packing unit as well as on the corresponding Certificate of Analysis.

Pharmacel® is packed in a multiple polyethylene outer bag with a polyethylene inner liner and has to be stored in original, unopened packaging in ambient conditions to maintain its shelf life.

DFE Pharma does not perform retesting at the end of the shelf life period.

It is the customers' responsibility to determine if the product can still be used in their application after the end of the shelf life period.
