## Accelerated 30% CO<sub>2</sub> reduction

- Guaranteed 30% reduction in carbon footprint for lactose from 2021 to 2030
- Backed by verified, primary farm-level data
- No offsets, no estimates, just real impact
- Annual report detailing the reduction progress

## Unique value-chain transparency

- Full traceability from farm to product
- Accountability across sourcing and production
- Premium pool of farmers implementing a wide range of interventions
- Farmers are incentivized and rewarded based on performance

## No regulatory complexities

- Seamless integration into existing products
- Same brands, same quality, just a sustainability add-on
- No change to the physical product
- No re-qualification needed

Real data	Real reduction	Real acceleration	Real impact
Credibly claim Scope 3 reductions	Driving sustainable practices across the value chain	Powered by a unique pool of farmers committed to climate action	No operational disruption, easy to implement

**Sustainable by design, Transparent by choice.**
